📍 Kolkata, West Bengal 🌐 GitHub in LinkedIn

Profile

Second-year undergraduate student in Artificial Intelligence and Machine Learning with a strong foundation in Python, data preprocessing, and supervised machine learning. Actively building practical, real-world applications and strengthening problem-solving skills through hands-on projects and continuous learning.

Relevant Experience

AI/ML Intern — SRIndia (Squarecell Resource India Pvt. Ltd.) Jan 2026-Feb 2026

Python, Machine Learning, Scikit-learn, Data Analysis

- Built supervised **machine learning models** for classification and regression using structured datasets.
- Implemented **Iris Flower Classification** and **House Price Prediction** models using **Logistic Regression**, **KNN**, and **Linear Regression**.
- Evaluated model performance using **accuracy**, **confusion matrix**, and **mean squared error (MSE)**.

Java Intern — Navodita Infotech

Nov 2025-Dec 2025

Java, APIs, Data Processing

- Developed a **Java-based weather application** to fetch and display real-time temperature and weather data.
- Integrated external **APIs** and implemented data parsing and handling for dynamic updates.
- Improved proficiency in **Java programming**, API integration, and problem-solving.

Projects

AI Early Warning System for Student Mental Health (Mindful check) 🔗

Jan 2026

Python, Machine Learning, NLP, Scikit-learn, Transformers, Streamlit

- Developed an **AI-based application** using **Natural Language Processing (NLP)** and **Machine Learning** to analyze student-written text and identify early signs of **stress, anxiety, and burnout**.
- Implemented **sentiment analysis**, **emotion detection**, and **risk-level classification** (Low/Medium/High) using **Python**, **Scikit-learn**, and **Transformer models**, with an interactive **Streamlit dashboard** for visualization and supportive feedback.

Resume Analyzer (Resume Insight Hub) 🔗

Oct 2025

Python, Machine Learning, NLP, ATS, Resume Parsing

- Built an **ATS-based Resume Analyzer** to evaluate resumes against **job descriptions** using **Machine Learning**.
- Trained **classification models** for **resume scoring**, **keyword matching**, and candidate ranking.

Travel Planner (Roam and Relax) 🔗

Aug 2025

Python, APIs, Route Optimization, Backend Development

- Developed a **travel planning application** generating **optimized itineraries** based on user preferences.
- Integrated **third-party APIs** for **routing**, **distance calculation**, and **real-time updates**.

Education

Heritage Institute of Technology

May 2028

B.Tech in Computer Science and Engineering (AI & ML)

CGPA: 9.18/10 (Current)

Relevant Coursework: Data Structures, Algorithms, Artificial Intelligence, Machine Learning

Technical Skills

Languages: Python, C, Java, R

CS Foundations: Data Structures, Algorithms

Tools: Git, GitHub, VS Code, Jupyter Notebook

Data Analysis & ML: RStudio, NumPy, Pandas

Web Technologies: HTML, CSS, JavaScript, Flask

Achievements

- Solved 100+ DSA problems on **Leetcode** [!\[\]\(467d80e979964f7f8c752fb22248b5b7_img.jpg\)](#)
- Actively participated in industry-recognized job simulations by **Deloitte** [!\[\]\(b71552d33dbf62adf5e5199a70ee02bf_img.jpg\)](#) and **AWS** [!\[\]\(03134b765d1473836ff001925b1b0550_img.jpg\)](#), gaining practical exposure to software development, problem-solving, and cloud architecture.
- Developed foundational expertise in Generative AI through **Microsoft & LinkedIn Learning** [!\[\]\(aed6947356668967079310026052edc0_img.jpg\)](#), with focus on responsible AI and real-world applications.
- Contributed as a Content Writing Intern at **Inamigos Foundation (NGO)**, supporting social awareness initiatives through impactful written content.
- Volunteered with **National Service Scheme (NSS)**, **HITK**, actively participating in community service and social responsibility programs.
